**Providing**  
**accessibility** to  
**accommodate**  
**the needs of**  
**every individual.**

---

# The Issue:

- Many websites are difficult to use for those with accessibility needs
  - Autistic individuals are unable to access cluttered, unstructured websites
  - Individuals with learning disabilities (ex. dyslexia) find it difficult to comprehend complex material

---

# Our Solution:

- We created a web-app that helps to meet accessibility needs when browsing websites
- Access For All features:
  - Text simplification
  - Image captioning
  - Consistent layout
  - Read-text audio
  - Font size adjustment
  - Dark/light mode
